THE UNDER GROUND RAILROAD OUT OF ORDER-ITS CONDUCTOR CONDUCTED TO THE STATE PRISON -The conviction and sentence of Wm. Johnson, Secretary of the Vigilance Committee of the Auti-Slavery Society, to the State Prison for three years; for passing counterfeit money, shows how dangerous it is to temper with moral principle; and how intimate is the relation between the different forms of vice. By the practice of ailing and abetting the escape of slaves from their masters, contrary to the spirit of the Constitution and laws, he learned to think lightly of civil obligations, and thus was prepared to transgress the laws in a different way. How many slaves have been spirited away by means of counterfeit money, we have no means of knowing. And yet Johnson, while concerned in this nefarious business, doubtless persuaded himself that he was doing God service. We hope the sad fale of Johnson will be a warning to the other members of the Vigilance Committee, and to Abolitionists generally .- N. Y. Journal of Commerce.

The Jupan Expedition-Insufficiency of our Force. We have learned from practical and reliable sourres-through the medium of some of the officers of the Dutch frigate Prince of Orarge, now lying off Castle Garden-that we shall have a tough job in geting the Japanees to consent to a commercial intercourse with us; and so far from obtaining a peaceable negonation and treaty, the Emperor of Japan is making preparations to give us a warm greeting-that he has strongly fortified every part on his coast, an i that he has a nation of well equipped soldiers ready to pounce down upon us. They agree in thinking that our force is atterly inadequate to the task an entry into the city of Jeddo, and doubt the sufficiency of the quantity of metal for pounding down any of their batteries, which are all of the strongest construction; and that if the lapanese have no war marine, they are otherwise well provided. The nation is warlike and united, and the country altogether difficult of access.

We are, ourselves, inclined to concur in these views, from all we have read and heard; and therefore we alvise Commodore Perry to look out sharp ahead, for if he fail, he can never show his face in this country again, or indeed in any other; for the eyes of all the world are upon him .- N. As Once a Greelan Malden-As once a Grecian maiden wore Her garland mid the sammer bowers, There stood a youth, with eyes of love To watch her white she wreathed the flowers.
The youth was skilled in Painting's art.
But ne'er had studied woman's brow, Nor knew what magic hues the heart Can shed o'er Nature's charms, till now. chorts.

Elest be Love, to whom we owe All that's fair and bright below. His hand had pictured many a rose. And sketched the rays that light the brook; But what were these, and what were those, To woman's blush, to woman's look? "Oh, if such magic power there be,
This, this," he cried, "is all my prayer,
To paint that living light I see,
And fix the soul that sparkles there."

His prayer, as soon as breathed, was heard; His pallet, touched by Love, grew warm; And Painting saw her hues transferred From lifeless flowers to woman's form. Still, as from tint to tint he stole The fair design shone out the more; And there was now a life, a soul,

Where only colors glowed before. Then first carnations learned to speak, And lilies into life were brought: While, manting on the maiden's cheek; You g reses kindled into thought. Then Uyacinths their darkest dyes Upon the locks of Beauty threw; And violets, transformed to eves. Inshrined a soul within their blue.

MESSES. EDITORS :- As you have positively interdicted a contin nance of the correspondence between James McIntire and Wm. E. Bunting, and as the reply of the latter is a direct attack upon myself, I hope you will allow me the privilege of saying to the public in self-defence, that I expect to reply through hand-bills, when it will be seen that, in place of James McIntire's denial of an unfounded charge against me being an electioneering movethent on my part, this charge from the beginning has been used for electioneering purposes against me; and that the reply of W. E Bunting was gotten up and written for that purpose, and then sent to him for his signature I also expect to prove, that W. E. Builting has repeatedly, both in conversations and letters, exfreesed himself satisfied that I had been unjustly censured in the natter; and that he believed me not ghilty of the charge. I also expect to prove, that Wm. R. Penny, upon whose evidence Wm. E Bunting now relies; denies that Jamies Mclutire ever told hun what he has reported And further, that W. B Bunding has, at turious times, and on public occasions, openly charged this same W. R. Penny-(though respectable, and no one believes him guilty)-with stealing sheep; of having broken into his smoke-house, and stolen his provisions; and against whom he had witnesses unmoned at last Superior Court, to discredit his testimony in this ame affair between James McIntire and himself.

Making Tar, Coal and Gas by Machinery.

THE attention and interest of the citizens of Wilmington and surrounding country of North Carolina are, sud am prepared to give all business entrusted to me, officient and personal attention. I lieve a wharf for Naval Stores, with ample accommodations, Spirit House, and Warehouse. Consignments of Naval Stores for sale or shipment, and all apparatus for the purpose of manufacturing for and coar, and severating gas from lightwood. and generating gas from lightwood.

The above machine was invented by Dr. Wm P. McConnell, an eminent chemist of Washington City, D. C., and having obtained a patent right for the United States for the same, he has associated himself with Veirs & Townshend, under the style of Veirs, Townshend & Co.

For the purpose of manufacturing and carrying on the business, they have had an apparatus constructed in Baltimore, oke Rail Road Company have completed their new sufficient to contain three cords of wood, and located on the wick county, N. C., from whom they have purchased all the lightwood on about six thousand acres of pine land, where The Cars leave Weldon daily at 3½ o'clock, P. M., and arrive at Portsmouth by 7 o'clock, P. M., in time to connect ent to carry on the business to much extent, and feeling desirous to introduce and show the utility and profitableners of said business, they have recently had constructed a small apparatus, near the Railroad in this place, from which a few days ago, they have given perfect satisfaction to all who in time to connect with the morning train that leaves for Phila- witnessed its operation, in regard to the surprising yield of tar from a cord of an average quality of lightwood, besides

the coal and gas, which is stated in certificate below by gen-

The machines are cylindrical in form, and the rim built of thin sheet-iron; there are four flues or retorts, extending from the top plate to bottom. The wood to be converted inthe flues heated with a small portion of the charcoal, made from the same wood, creating an intense heat in the Fody of the machine, causing the tar to ran out from a spout near to land and receive Passengers, and Passengers who leave the bottom of the machine. Two hands are sufficient to attend to two machines, each containing four cords of lightwood, after it has been delivered at the location ;-that is. Rail Road and Steamboat Companies, by which the same they will place in the wood, fill the barrels with tar, and take out the coal ;-thus making an operation each day from the size, it will be discretionary with those who use them. and any other information desired, enquire of the Agent at Weldon.

E. N. PETERSON, Agent.

They can be made to char and contain twenty cords; and in regard to durability, the flues being the only part exposed to the fire, and they being built of thick boiler iron, have been pronounced by experienced judges, to last more than two day. The cost of apparatus is comparatively small.

Those who wish to engage in this (a very lucrative) business, or wish farther information, can obtain such by addressing Veirs, Townshend & Co , Wilmington, N. C., as

No other extras are article of Tar, and a similar article made in Brunswick Co by a larger machine, capable of holding three cords, which has been located on Mr. J. R. Grist's place, on Livingston Creek, has been said by Mr. Henry Nutt in this market for \$2.25 per barrel, while that made in the old way brought wood, about two barrels of tar, as in the old mode from tar kilns, they, by their patent machine, which is both simple and complete, produced the astonishing yield of one and a third nouth they enter. It is highly important that all should be barrels from the above named one fourth of a cord of wood, then formed, and an absence of a few days seldom fails to wood being charred regularly. The taris steamed and can ed to run out pure and unadulterated; the coal is of the very best quality; the gas generated at the same time is not so dectionable in a sanitary point of view as the coal gas:either in its preparation or its use it has no unpleasant smell; even in its crude state it contains no ammoniae nor sulphurated hydrogen, nor earbaretted sulphur, nor in burning does
